## Berrylicious

Whether spring, summer, fall or winter, there is no denying the luscious temptation of deep, berry hues. The richness of Color Marketing Group's "Berrylicious" is mouthwatering and practically palatable as it graces home and fashion.

Realized in everything from textured brocade to fur to paint to contract textiles, it is a color that can stand alone, as well as offer a springboard from which other hues can contrast. It is fresh way to enliven grey, becomes shocking with coral and can be calming when layered with other berry-inspired hues.

Fresh from the produce aisle, "Berrylicious" brings luscious to glorious life.
