Touch of Hope

An emerging pink with a simple, joyous, touching spirit, "Touch of Hope" is an encouraging color of affirmation for every day, and every year, to come.

Youthful, but considered sophisticated, it embraces the subtle strength of modern femininity and adds a playful quality with a slightly retro edge. Made comfortable with a visually chalky texture, it offers an escape from technology and speed-racing through life.

Appearing as an accent and accessory in home and fashion, it will continue to influence metals (think pink gold) and precious stones (pink sapphires and diamonds!)

Sit back and bask in the glow of "Touch of Hope."
