

## COLOR INSPIRATION TOOL FOR YOUR DIGITAL WORKFLOW

### CMG 2009 Spring International Conference

At the 2009 CMG Spring International Conference, a new benefit to CMG members was made available by having the colors from this year's conference report available in a digital format. Now you will be able to work with the new colors immediately by importing them directly into your design software.

This new benefit is made possible through, CMG's partnership with X-Rite, and utilizing the latest in color management technology, the ColorMunki. By using color management in the digital workflow, you can ensure consistent renderings of your colors across any technology tools used to display your work.

The Digital Color Reports are available for download at [colormarketing.org](http://colormarketing.org)

## Meet ColorMunki Design

Color Inspiration Tool for your Digital Workflow

Select colors from Munsell Book of Color, Pantone® PMS and Goe™ libraries, image libraries or capture spot colors from just about any surface. ColorMunki Design also includes essential color control functions to make collaboration more effective and possible for calibrating displays, projectors and printers from this all-in-one device.

### ColorMunki Design– Capture, Create, and Collaborate

- **Capture** - Grab color from any surface, and pull the color palettes out of any photo.
- **Create** - Compatible with the major design programs, ColorMunki works with your tool of choice.
- **Collaborate** - Ensure that your colors are true, no matter how you share them.

Use coupon code **CMGCM15** today and receive a 15% discount
